### Bohemian Logical & Philosophical Café, Founder, Scientific committee and Coordinator,

Since my arrival at the Maths Institute of the Czech Academy of Sciences I promoted and I have been the general coordinator of a new initiative of webinars in emerging topics in logic. The project has a quite broad scope and is willing to encompass a variety of subjects: theoretical computer science, category theory, mathematical logic, and philosophy. More information is available [here](#).

### Masaryk University Algebra Webinar, Founder and main organizer until July 2020,

During pandemics I promoted to transform the local Algebra permanent seminar of Masaryk University into a permanent webinar. Especially at the beginning the whole organization was upon myself, many of the first speakers were directly suggested by me. I maintained the webpage and the youtube channel until the end of my PhD studied. Nowadays the [webpage](#) and [youtube channel](#) are maintained by John Bourke.

### Peripatetic Seminar on Sheaves and Logic 103, Promoter and Coordinator,

PSSL103 is a Peripatetic event in Categorical Logic. During my first year of PhD (2018) I promoted an instance of this tradition in Masaryk University. Having the approval of my advisor and Peter Johnstone, I was in charge of the organization. I coordinated the effort of other researchers, such as John Bourke, Simon Henry, Fosco Loregian and Micheal Lieberman. The webpage of the event is not online anymore, but the event is listed in [this webpage](#).

## Community

---

### ItaCa, Promoting Committee,

[ItaCa](#) is the Italian community of category theory. The project was founded by Giuseppe Metere in 2019. I was invited by Andrea Montoli to join the Programme committee of ItaCa 1, the first official meeting of the community. The event took place at the University of Milano, the webpage of the event is still available [at this link](#). Since this invitation I have been an active member of ItaCa. In the same year I was invited to join the Program Committee of ItaCa Fest. ItaCa Fest is a webinar aimed to gather the community of ItaCa. Click [here](#) to visit the webpage of the Fest. Since January 2021 I am one of the members of the [Promoting Committee](#), this is the coordinating committee of the entire project.

## Administrative Duties

---

### Coordinator for the Master's programmes in logic at Gothenburg University,

Since January 2025 I started co-coordinating the Master in Logic at Gothenburg University. Since March 2025 I will be the coordinator.

### Member of the Postgraduate Education Group (FUG) at Gothenburg University,

The Postgraduate Education Group (FUG) is an advisory body for postgraduate (third cycle) education at the department. FUG consists of representatives of the active supervisory boards, two representatives of the doctoral student board, and the responsible education administrator. Representatives are appointed by the Associate Head of Department for Doctoral Studies.

### Thesis Reader (Granskare) at Stockholm University,

Stockholm University evaluation process for Bachelor and Master thesis is based on a double review system. A part of the evaluation comes from an opponent and another one comes from a reader (granskare). The granskare must assess whether the thesis is solid enough to be defended. During my stay in Stockholm I was granskare few times. 2022: Thea Li, The internal logic of a topos. 2023: Caroline Roos, Agda formalization of Lindenbaum-Tarski algebras.

### **Thesis Reader at Masaryk University,**

Masaryk University evaluation process for Bachelor and Master thesis is based on a double review system. One review comes from the advisor of the student and another one comes from an internal opponent. Both the reviews must describe, discuss and finally score the thesis from A to F. During my PhD studies I was three times opponent for bachelor theses. 2019: Yuriy Dupyn, Algebraic Structures. 2018: Jan Jurka, Locally presentable categories. 2018: Vladislav Demenchuk, Elements of nonstandard analysis.
